

Pirate Math Grades 1-3

Advancing Evidence.
Improving Lives.

FUCHS TUTORING at the American Institutes for Research (AIR) is a suite of professional learning services designed to help teachers implement high-quality, effective tutoring and intervention programs in schools.

Join this interactive two-day virtual training institute led by our expert AIR trainers to learn more about Pirate Math (grades 1-3) and how to implement the programs with fidelity. Training consists of an overview of the Pirate Math programs, research, and materials and addresses the basics of implementation.

Registered participants will have access to an **online community of experts and educators** to support implementation after the institute.

Pirate Math is a systematic structured tutoring model for building number knowledge, arithmetic skill, and word-problem solving. During the Pirate Math word-problem solving instruction at grades 1-3, students learn to identify the underlying conceptual frameworks of three common types of word problems: total, difference, and change.

DATE AND TIME

March 22, 2023: 12 – 3 PM EST (via ZOOM)

March 23, 2023: 12 – 3 PM EST (via ZOOM)

A certificate of attendance will be provided.
