BRIDGING RESEARCH AND PRACTICE TO IMPROVE LIVES

RESEARCH. EVALUATION. APPLICATION. **IMPACT.**

Our global community is facing unprecedented challenges. As we search for a way forward, the vulnerable among us feel the impact of inequality the most. If ever there was a time for policymakers, leaders, and practitioners to use the best science available to address our social problems, that time is now.

At the American Institutes for Research, we conduct rigorous research and apply evidence-based practices to improve people's lives, from birth to end of life, both domestically and across the globe. Our work informs the policies, programs, and systems that build on one another to ensure that:

- All students have access to a high-quality **education**;
- All **youth**, particularly those who have been historically underserved, have a chance to thrive in their communities;
- Training and **postsecondary education** create solid pathways to stable jobs;
- All people benefit from a strong **public health** system and the most effective and affordable **health care**; and
- Today's **workforce** is prepared to address the most pressing challenges of the 21st century.

For us, making the world a better place is not wishful thinking. It is the goal that drives us.

Research & Evaluation Capabilities

- Rigorous research design, analysis, and reporting
- Small- and large-scale studies and surveys
- Systematic reviews and meta-analysis
- Measurement and psychometrics
- Advanced data analytics, artificial intelligence, and machine learning

Technical Assistance Capabilities

- Systemic change using evidence-based approaches
- Coaching, training, online learning, network development, and other targeted support
- Needs assessment, monitoring, evaluation, and other continuous improvement services
- Knowledge translation and evidence dissemination
- Communications initiatives and campaigns

MISSION FIRST

Our mission is to generate and use rigorous evidence that contributes to a better, more equitable world.
